

„switch coal“

replacing coal plants worldwide by **Renewables**

You can make the difference!

Save our climate

Just 3 easy, quick steps will do it:

1. Find a coal plant
2. Determine the solar potential
3. Determine the wind potential

HELP US using our Website:

www.ZeroEmissionThinkTank.com/ -> Switch Coal Go2Zero

Zero Emission Think Tank (ZETT) asks for your help for our new solutions study „switch coal“: Is it *even cheaper* to substitute each of the 2,000 coal plants in the world by 500MW Wind-Solar-Battery Systems?

Let`s run the economics, based on Bloomberg/Fraunhofer data!

„ Because
renewables
are cheaper!“
Al Gore COP27

„switch coal“

replacing coal plants worldwide by Renewables

What needs to happen for **1,5 degrees**? 2 things:

- 1) GREEN TECHNOLOGIES growing exponentially  US Green Deal
- 2) **Exponential Degrowth: Switch coal** to cheap renewables  30% CO2 emissions less & saves billions of dollars!

- Wind-Solar-Battery-Systems allow for a fast transition & it's even **cheaper!**

- Our new ZETT* - Solutions study „**switch coal**“ will show where and how.

ZETT* = Zero Emission Think Tank

„switch coal“ / We need your help!

The focus is on over **2,000 coal plants**

Students can greatly help with research & can be named in this world wide study („supported by students all around the world“)
